The successful separate collection of cardboard is a model that could be applied to other waste streams. This will increase recycling rates.

Key Messages

The successful separate collection of cardboard is a model that could be applied to other waste streams. This will increase recycling rates.

Use your bins correctly

Businesses must improve segregation: 70% of the material currently in the black could be recycled or composted.

Present your recyclables clean, dry, loose.

Say NO to the throwaway culture

avoid single use products.

Stop food waste

Improved management of stock can prevent avoidable food waste.
